

TRUTH PROOF about DISCHARGE PULSATION

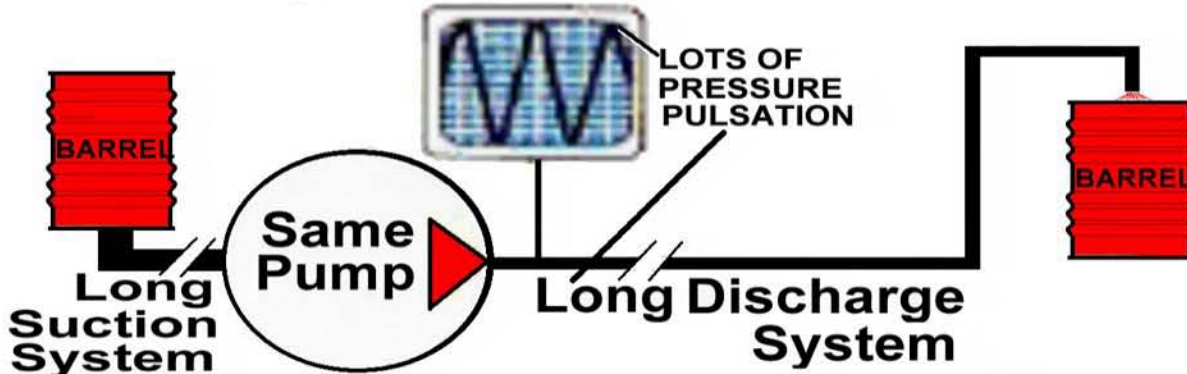

Pipe systems cause pulsation. Hard systems destroy pumps.

Same Pump, NO PULSATION

Pumps make flow fluctuations, Systems convert them to pressure pulsation.

Same Pump, LOTS OF PRESSURE PULSATION

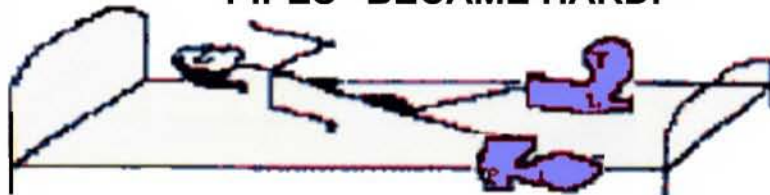

As truth is defined by "what if-what if not" you proved to yourself that : pipe systems make pressure pulsation.

When we were seventeen and could run a 1/4 mile in 60 seconds, our pumps could work, because our veins and arteries were soft and "dilatable".

& The 400 Meters

When we die in bed with our boots on, and the quack says "of natural causes", his pronouncement is simply that our "pump" was tired BECAUSE OUR "PIPES" BECAME HARD.

Restrictions make systems "hard"

HARD SYSTEMS KILL PUMPS
